Subject: Olin Corp./McIntosh Plant Closure Sampling Requirements

----- Message Contents -----

Cheryl,

I have discussed the closure sampling situation (i.e. the approved sample parameter list in the Revised Sampling and Analysis Plan and the subsequent letter we mailed requiring a full Appendix VIII) with Bev and we propose the following:

- Olin can continue to collect samples according to the approved Plan;
- RCRA will transmit a letter indicating that if Olin will sign an affidavit for the closed units then we will not require Appendix VIII sampling; and
- I am going to request ESD to perform a one-time Appendix VIII soil and groundwater sampling event to verify clean closure.

Lael Butler
